The powerful GA/GP-T Series is designed to support O.D. grinding in high volume, automated production environments.

Description

The powerful GA/GP-T Series is designed to support O.D. grinding in high volume, automated production environments. The compact T-Series is engineered to hold the workpiece stationary while the grinding wheel traverses back and forth. Available in both angle and plain head, this design is extremely cost effective for production lines with small- to mid-sized parts. The machines accommodate parts up to 25.59" long and up to 110 lbs.
