SIMUL TURN LU4000EX

Brand: Okuma Australia
Product Code: STLU#4000
Availability: In Stock
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Short Description

The LU4000 EX turning center is Okuma's latest evolution of 4-axis turning in the 10-15 inch chuck class.

Description

The LU4000 EX turning center is Okuma's latest evolution of 4-axis turning in the 10-15 inch chuck class. Two tools at work simultaneously provide process flexibility as well as high removal rates. The large work ranges of the upper (V12) and lower (V8) turrets mean less interference and more flexibility. The LU4000 EX has a 45-degree box bed with all box way construction, which provides optimum support for the carriage and cross slide. The three-point bearing support for the spindle means stability and long life for this very accurate spindle. The LU4000 EX is equipped with Okuma's OSP P300 control. The one-screen "easy operation" feature on this control system, combined with the open architecture design make it suitable for operators of all levels.
